DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-24, drawn to method for obtaining proteins facilitating crystallization, classified in class 435, subclass 69.1.
- II. Claim 25 , drawn to method for obtaining crystallized protein, classified in class 530, subclass 418.
- III. Claims 26-35, drawn to method for obtaining 3-D structural information, classified in class 702, subclass 19.
- IV. Claim 36, drawn to method for obtaining protein structure from structure data of another protein, classified in class 702, subclass 19.
- V. Claim 37, drawn to method for predicting protein structure, classified in class 702, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-V are related as independent and/or patentably distinct methods which have different modes of operation, different functions, or different effects.

A reference teaching one method (e.g. obtaining proteins facilitating crystallization,

Page 3

of another protein, as in method of Group V).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject

matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete

must include an election of the invention to be examined even though the

requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if

one or more of the currently named inventors is no longer an inventor of at least

one claim remaining in the application. Any amendment of inventorship must be

accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee

required under 37 CFR 1.17(h).

Election of Species Requirement

Election of species should be required prior to a search on the merits

in all applications containing both species claims and generic or Markush

claims.(MPEP 808.01(a))

If group I is elected, the following election of species is required:

This application contains claims directed to the following patentably distinct species of the claimed invention:

- selection criteria species as in claims 3-5,19-20.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1,2,6-18,21-24 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this

Art Unit: 1631

is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (571) 272-0713. The examiner can normally be reached on 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on (571) 272-0722. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
